

Benefits of Cloud and On-Premise Comparison Sheet

Unanet's Cloud Solution

- No upfront investment in infrastructure components (database, server, etc.)
- Ability to easily scale system capacity
- Secure, reliable, and available solution provided under a strict Service Level Agreement
- Unanet's private cloud approach ensures data security
- Data encryption in transit, live and at rest
- Encrypted backups
- Redundant firewall scheme for advanced security
- High network availability with 24x7 remote access
- Faster implementation as environment is immediately available
- Unanet upgrades applied as available with no customer effort
- Simple, distributed quarterly subscription payments for usage and maintenance combined
- Migration to On Premise license available
- Allows customer's IT staff to focus on higher priority areas rather than day-today operational efforts
- Custom reporting access available via Unanet's Cloud Data Warehouse
- Integrate with single sign-on and multifactor authentication providers via SAML

Unanet's On-Premise Solution

- One upfront payment for license with annual maintenance renewal
- Choose configuration with existing/new servers and desired database
- Integrate with MS Active Directory for automatic login to Unanet or via SAML for single sign-on and to multi-factor authentication providers
- Incorporate Unanet database backup into corporate schedule and process
- Access Unanet database directly for additional, external reporting using your preferred business intelligence tool
- Uses your already established IT resources
- Expand internal technical skills profile
- Flexibility to install separate test Unanet systems for company specific testing
- Migration to Unanet's Cloud Solution available
