Unanet Pay

Introducing more flexible ways to send invoices and get paid faster.

Streamline communications and collections

Unanet Pay is designed to help you reduce the time and effort needed to receive payments from your clients with:

- Enhanced tracking tools, automated reminders, and online payments

- Support for ACH and Credit Cards, no more waiting on a check in the mail

- Seamless invoicing experience for clients

- Financial reconciliation and reporting

powered by stripe

Gilmore & Associates: Unanet Pay Success Story

Gilmore & Associates, Inc., is a regional civil engineering and consulting firm that has used Unanet A/E for over 12 years. They began using Unanet Pay in June 2020 and have experienced significant efficiency and time-savings:

5 Day
decrease in days sales outstanding (DSO).

$50-$60k
increase in monthly receipts due to expanded electronic payments.

Unanet Pay Features & Benefits

STREAMLINE INVOICE DELIVERY
Sending printed invoices not only spends employee hours; it adds delivery time, delaying payments and collections efforts. Delivery / Payments expedites your invoices and gets them into the hands of your customers immediately.

TRACK EMAIL DELIVERY AND CUSTOMER ENGAGEMENT
Emailed invoices are enabled with detailed tracking with metrics for email send status, delivery, opens, and clicks. This means you will have the ability to measure customer engagement and make strategic decisions on how your invoice emails are performing.

COLLECT PAYMENTS QUICKLY AND EFFICIENTLY
Get paid faster by enabling secure, compliant invoice payments, accounting for every transaction seamlessly and easing reconciliation efforts. Today, millions of businesses of every size use Stripe to accept online payments.
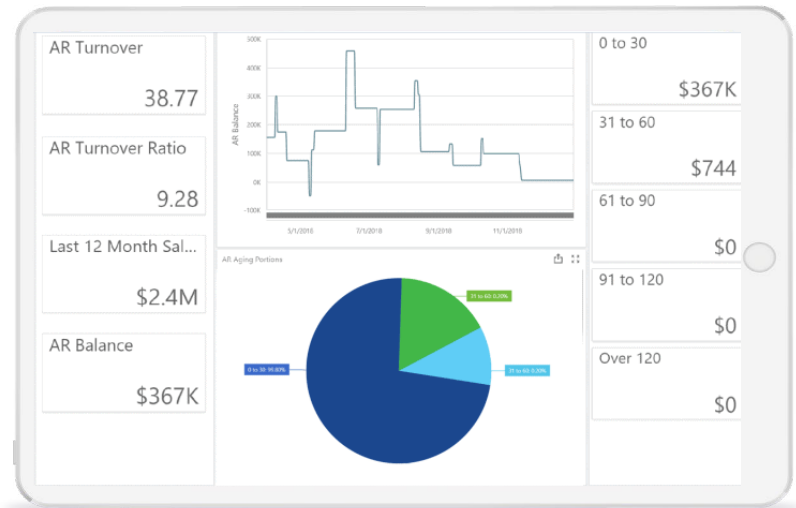

COLLECT ACH PAYMENTS WITH SEAMLESS BANK AUTHENTICATION
In addition to accepting credit cards, Unanet A/E makes it easy to receive payments through ACH. Payers can quickly add their bank to make ACH payments with full support for bank authentication and real-time balance validation.

ACCELERATE CASH FLOW WITHOUT ADDITIONAL COST
Unanet Pay offers customer-friendly, incentive-driven fee sharing that enables users to share merchant fees with their payers. Fee sharing further simplifies the invoicing process for all parties and increases time-to-cash.

TAKE THE WORK OUT OF CHASING PAYMENTS
Automatic payment reminders allow you to set up and send reminders at a cadence you determine, which means you can tailor your customer experience with no invoice overlooked. This frees up staff to focus on priority collections efforts, increasing accounts receivable resolutions across the board.

EASILY ACCOUNT FOR EVERY STRIPE TRANSACTION
When you receive payments via Stripe, you can automatically see that data flow into the system, easing reconciliation efforts. Plus, with Analytic Dashboards, you'll have full visibility into your collections' KPIs.
