

The One Software for Projects, People and Financials

Over 1,000 clients trust Unanet to help their professional services organizations plan, track, manage, and grow! Unanet software is the one truly integrated project based ERP on the market today. Unanet clients mention that Unanet is extremely functional, easy-to-use, and highly adoptable by their organizations. While employing one system that all stakeholders enjoy operating, Unanet clients cite 50% lower G&A headcount than organizations running competitive software, drastically reducing the total cost of ownership. Additionally, Unanet provides superior implementation and training services, and has unparalleled customer support!

POWER YOUR BUSINESS

1. Real-time visual insight into the progress and performance of your projects, people & financials
2. Optimize resources based on availability, skills, and budget
3. Staff projects for the long and short term using resource requesting or spreadsheet-like grid planning
4. Improve accuracy, time, and costs for timesheet and expense report data; capture via the web
5. Maximize revenue with utilization and revenue forecasts
6. Enhance project management, budgeting, and real-time reporting
7. Purchasing functionality from Purchase Requisition (PR), issuance of the Purchase Orders (PO), through to customer invoice
8. Calculate indirect rates, report on direct & indirect project costs, and project profitability in real-time
9. Manage the entire bid-to-bill-to-book lifecycle with revenue recognition, invoicing, and accounting
10. Manage and report on Time & Materials, Fixed Price, Pre-Bill, and Cost Plus work

UNANET POWERS THE PROJECT LIFECYCLE

IMPROVE YOUR PROJECT DELIVERY

- Optimize resource utilization and capacity planning by project, customer, department, and people
- Automate business rules and improve accuracy, increase the speed and reduce the cost of time and expense reporting
- Improve management decision and productivity through integrating project management, resource planning, purchasing, time & expense tracking, billing, invoicing and revenue recognition, and accounting
- Rapidly deploy an easy-to-use but powerful web-based system which can support the different roles across your distributed organization for the entire bid-to-bill-to-book project lifecycle
- Access status and performance data anywhere, anytime
- Integrate accurate real-time data capture with existing accounting and ERP systems

COMPLIANCE WITH FEDERAL GOVERNMENT REGULATIONS

Over twenty years of DCAA-compliant implementation and product development experience, spanning 300,000 users and over 1,000 customers. Unanet features supporting DCAA requirements include:

ACCESS

- Users access only their individual timesheets and/or expense reports
- Users limited to authorized projects/activities/tasks
- Approvers restricted from editing user's timesheet/expense reports
- Password security features

WORKFLOW

- Changes to "saved" time captured in audit trail
- Automated approval workflow event process
- Automated timesheet/expense approval audit trail
 - User initiated adjustments and approval
 - Post submittal and approval review
 - Automatic reminder notices

CONTROL

- Time may not be reported in advance
- Comments to describe and substantiate time and/or expenses
- Delinquent time (daily time entry required) report
- Timesheet status report
- Validations to ensure accurate changes
- Weekly overlap time period

CONTRACT SUPPORT

- Pay codes
- General and Project Labor Categories
- Total Time Accounting (Adjusted Cost Rate)
- Assignment reports
- Project performance report
- Project status report
- Teamwork notes collaboration

- Real-time project reporting including calculation of direct and indirect project costs by cost element with calculation of revenue, fee, average labor rate etc. Unanet supports an unlimited number of cost elements and cost structures, and calculation of burdens based on target, provisional and actual rates.
- Purchasing integrates directly with timekeeping, expense, financials, and billing, saving time and money, and increasing accuracy.
- Master and Project Labor Category rates can have effective dates, with escalation to reflect pricing or schedule changes.
- Fully automated per diem support based upon location, and meals and incidentals. This ensures expense reporting is quick, accurate and easy for the end users and approvers.
- Unanet offers a consistent interface for project managers, no need for additional costly software, and a single database for their project schedule and cost data, enabling accurate, real-time reporting.
- On-demand indirect cost rate calculations from GL, with drill-down inquiry on rate calculations.
