

MIDÉ TECHNOLOGY IMPLEMENTS UNANET FINANCIALS TO INCREASE FORECASTING CAPABILITIES AND STREAMLINE FORMERLY MANUAL PROCESSES

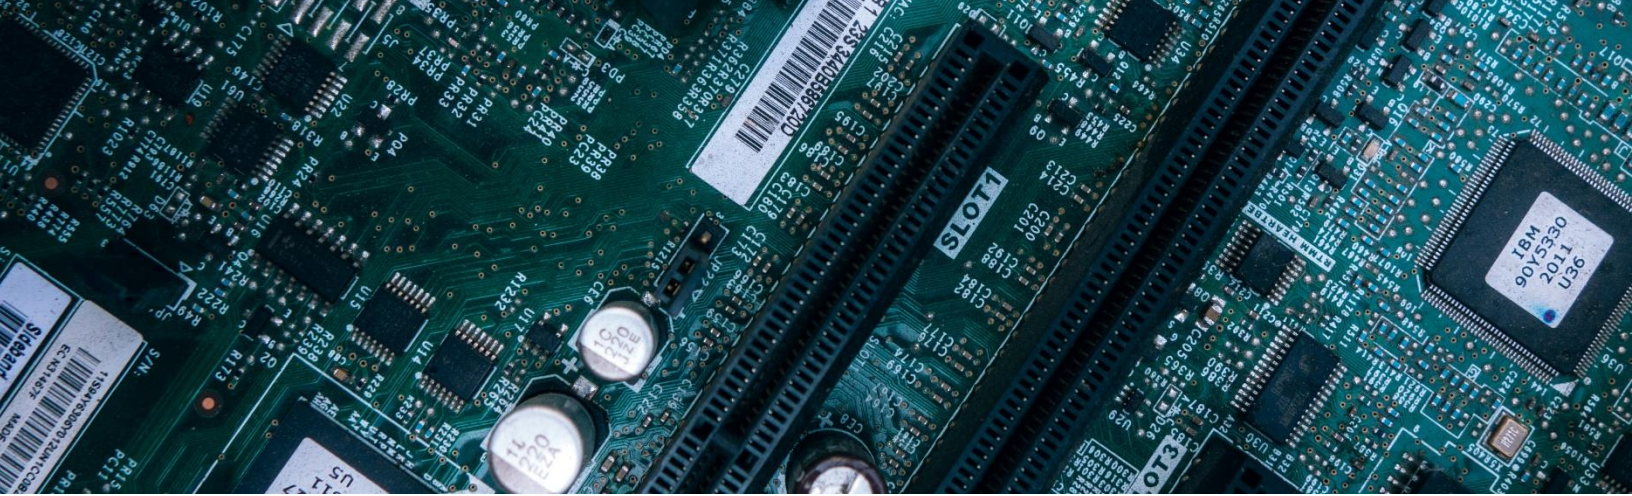

Midé Technology is dedicated to providing its customers with innovative value-added engineering solutions. They rely on having a strong team of committed experts to accomplish this but were struggling to accurately anticipate their need for new staff and see team members' existing workloads. After considering several different solutions such as Microsoft Dynamics and Deltek Costpoint, what set Unanet apart was its cohesive, built-in financials package and real-time reporting capabilities.

CHALLENGES

- Former system Deltek GCS and disparate spreadsheets made finding real-time, accurate financial and resource information difficult
- Lacked visibility into forecasting to understand incoming work and talent needs
- Multiple existing versions of the truth caused problems with communication across teams
- Wanted to improve their arduous month end close process
- Desired more consolidated expense reports and the ability to easily pull receipts when needed

"Implementing Unanet just streamlined EVERYTHING! Our employees quickly adopted and started seeing the great benefits of Unanet. The amount of time saved on administrative tasks has been significant allowing us to grow our business more efficiently and effectively."

- Chris Ludlow, CFO, Midé Technology Corporation

Midé Technology Corporation, founded in 1989 develops, produces and markets high performance products for many industries including; aerospace, automotive and manufacturing. Our innovative people, systems approach, and customer focus provides us with the ability to conceptualize, design and deliver these high performance, intelligent systems and services tailored to our clients' specific needs.

Over 2,000 professional services organizations trust Unanet's Cloud or On-Premise ERP platform to scale their businesses while drastically reducing G&A in a "Single Source of Truth". Professional services organizations include government contractors, technology, digital agencies, life sciences, and management consulting.

THE UNANET SOLUTION

Midé Technology Corporation made the switch to Project Portfolio Financials to streamline internal operations while continuing to grow as an organization.

They now have a single solution for projects, people and financials with real-time data reporting and forecasting features.

Unanet has provided them with much-needed resource forecasting capabilities and overall increased company productivity.

After implementing, Midé' Technology Corporation:

- Was able to significantly reduce the amount of time spent on tasks that were previously handled manually
- Has implemented more proactive resource planning tactics, instead of having to be reactive to changing needs
- Significantly transformed their month end close process, contributing to quicker and simpler closing of the books
- Enjoys greater visibility into their projects
- Is better about to strategically manage their expenses and can review in real-time
