

SUCCESS STORY

SevITech Grows and Brings Two Companies Together with Unanet

CHALLENGES

- Wanted to integrate two companies on different platforms into one system
- Needed to incorporate and manage a larger proportion of Cost Plus projects
- Struggled to enforce new employee rules and compliance requirements
- Required greater efficiencies and streamlined processes in order to properly manage more data in the system

“We are glad we went with Unanet, and feedback from the new invoicing staff reinforced that we made the right decision.”

- Jamie Flynn, VP Finance & Accounting, SevITech

ABOUT SEVITECH

Founded in 2010, SevITech provides IT, engineering, and program management solutions delivery. SevITech focuses on providing program and IT support services to critical missions across Federal and Commercial Clients.

SevITech emphasizes corporate responsibility and excellence in service, both of which are key components in their business and operating policies. They take great pride in conducting their business with integrity and honesty, and hold their employees to the same high standard of performance quality and commitment to the organization. SevITech executives are committed to making sure their employees maintain up-to-date relevant certifications, use proven solution methods and processes, and stay informed of new developments in technology so that they remain relevant leaders in the marketplace. These shared values, coupled with SevITech's passion for the missions they support, are the factors that drive their continued innovation.

THE UNANET SOLUTION FOR SEVITECH

After acquiring another company more than twice their size, SevITech decided to manage both entities in Unanet. They moved all new employee and project data from Costpoint to Unanet Financials, and with that came many new requirements around Cost Plus projects and OCONUS work. Unanet allows SevITech to automate rules to enforce these requirements while maintaining existing process efficiencies.

After implementing and expanding Unanet Financials, SevITech:

- Seamlessly incorporated the acquired company into their Unanet system
- Manages new Cost Plus projects with visibility into real-time data
- Automatically enforces OCONUS rules, saving time and reducing errors
- Enjoys the benefits of the Automated Analyst, Unanet's automated solution that proactively identifies data issues for resolution
- Reduced cash cycle time with clean, easily understandable invoices and receives some customer payments in as few as 5 days

Where Information Means Insight

Unanet is a leading provider of ERP solutions purpose-built for Government Contractors, A/E, and Professional Services. More than 2,000 project-driven organizations depend on Unanet to turn their information into actionable insights, drive better decision-making, and nurture business growth.
