Unanet AE Project Central

Accelerate projects. Meet deadlines. Increase profits.

Power better decisions with real-time project visibility from anywhere.

Siloed project planning creates confusion as Project Managers struggle to get a clear picture of project performance, profitability, and resourcing. With no centralized project hub, Project Managers create their own reports that are out of sync with the actual financial positions of their projects.

Unanet AE Project Central is a unified, comprehensive digital experience that gives Project Managers full visibility to the status of their projects in real-time, all the time, from any device.
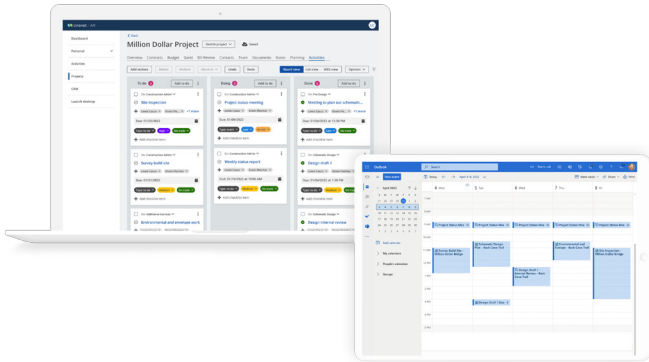

57% of project managers report forecasting (including scheduling and resource allocation) as their most significant project management challenge.

48% of AEC firms cite lack of integration between Project Management and Finance tools as among the top financial challenges for their company.

Unanet AE Project Central Features

CUSTOMIZED PROJECT GRID

enables clear prioritization through color coded, filterable, exportable project lists

PROJECT FLAGS

allow Project Managers to set up easily-viewed icons on the projects grid, delivering personalized, quick insight

OVERVIEW DASHBOARD

with KPIs at the Project and Phase Level
