

SIMPLIFY THE SUBCONTRACTOR MANAGEMENT PROCESS FROM ONBOARDING TO INVOICING

Introducing Unanet's Subcontractor Portal, a powerful enhancement to our Financials solution

Unanet. Where Information Means Insight

Manage subcontractors in one place: Unanet Subcontractor Portal

Time is money, and you do not have extra to spend on reconciling timesheets from disparate systems, correcting mischarges, fighting accrual nightmares, and resolving incorrect or delayed invoices.

With the Unanet Subcontractor portal, an enhancement to our Financials solution, Subcontractors log in to one portal to enter their time and expense, just like they would in their own system. The Subcontractor Portal simplifies the Subcontractor management process from onboarding to invoicing, strengthening the relationship between Prime and Subcontractors.

EASIER TIME & EXPENSE PROCESS

Subcontractor employees input and approve their time and expenses in a dedicated portal.

IMPROVE PROJECT EXECUTION

Gain real-time visibility and control over the project, enabling your team to make better decisions.

KNOW EXACTLY WHERE YOU STAND

Keep an eye on where your funds are going with perfect clarity into your open commitments.

MAKE THE MOST OF AUTHORIZED HOURS

Assign Subcontractor employees directly to a Purchase Order and to the project.

SIMPLIFY THE ONBOARDING PROCESS

The Subcontractor can register their own employees into Unanet.

REDUCED ADMINISTRATIVE BURDEN

Subcontractors self-manage PO review and assignments and vendor invoicing within the Subcontractor Portal.

STREAMLINE PROCESSES & COMMUNICATION

Eliminate emails and constant manual changes, saving time, reducing errors, and allowing the Prime to get paid faster.

EARN CASH FASTER & INCREASE PROFIT

Shorten the cash cycle by 4-8 weeks per subcontractor and decrease days sales outstanding (DSO).

SPEND LESS TIME RECONCILING

Decrease accrual amounts, leaving more time to focus on what's most important.

WHITE LABEL FRIENDLY

Use the logo of your choice.

Where Information Means Insight

Unanet serves more than 2,000 businesses with its ERP software solutions purpose-built for professional service organizations. Unanet's software helps project-driven organizations reliably plan, track and manage projects, people and financials. Unanet's customer-centric culture means we strive to deliver insights with personal service.
